

“12th Avenue Active Transportation Corridor” Alternate Routes

Mixed Facility Route: These routes use the existing bike lanes on 11th and 13th Avenues. State law allows a cyclist to use the travel lane on streets where bike lanes are present if the cyclist needs to position themselves to make a turn (such as a left turn from 11th Ave. onto Olive).

Bicycle Boulevard Route: These routes travel along low-speed, low-volume streets. There are no dedicated bike facilities, but provide a similar user experience to 12th Ave.

Other: OREGON 814.410(b) requires bicyclists operating on a sidewalk to give an audible warning before overtaking and passing a pedestrian and requires bicyclists to yield the right-of-way to all pedestrians on the sidewalks.
